Severe Weather Outlook Friday, May 04, 2018

Hazardous Weather

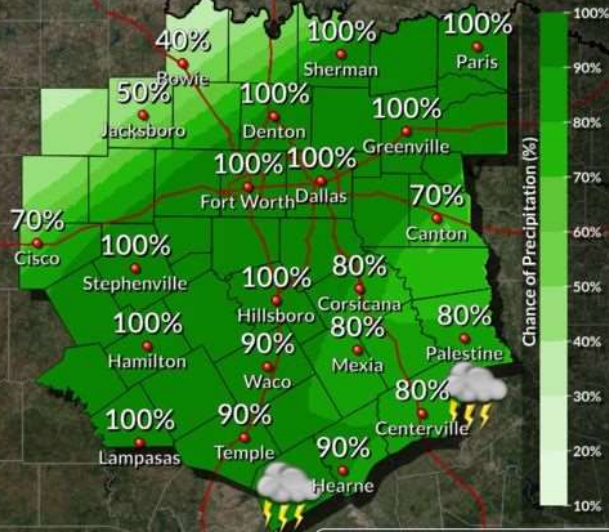

This Morning

Cloudy with showers and thunderstorms

Weather Forecast Office
Fort Worth, TX
Issued May 04, 2018 8:03 AM CDT

An area of showers and thunderstorms will move across the region this morning. Locally heavy rain may result in some street and stream flooding mainly south of I-20/I-30.

806 AM CDT
Fri May 4 2018
National Weather Service
Fort Worth, TX

f t v NWSFort Worth

Expect scattered to numerous showers and thunderstorms this morning as a cold front and upper level disturbance approach. In addition to cloud to ground lightning, some storms may produce hail up to the size of Ping Pong Balls, wind gusts to 60 mph, and locally heavy rain.

This Afternoon

Strong to severe storms possible along & SE of a Lampasas to Athens line. Issued May 04, 2018 3:41 AM CDT

Weather Forecast Office
Fort Worth, TX

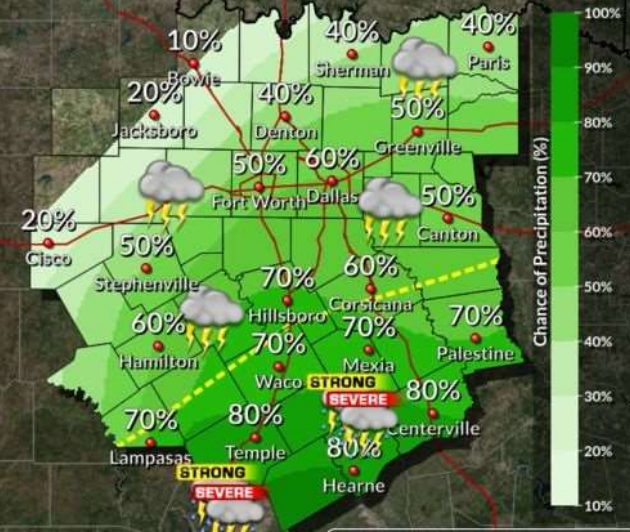

Showers and thunderstorms will gradually taper off from the northwest this afternoon as a cold front moves farther south.

Some strong to severe thunderstorms will be possible mainly along and southeast of a Lampasas to Athens line

Some storms may produce:

- * Hail up to the size of Ping Pong Balls
- * Wind gusts to 60 mph.
- * Locally heavy rain

430 AM CDT
Fri May 4 2018
National Weather Service
Fort Worth, TX

f t v NWSFort Worth

Showers and thunderstorms will gradually taper off from the northwest this afternoon. Areal coverage will be highest along and south of the I-20/I-30 corridors. Some strong to severe storms will be possible mainly southeast of a Lampasas to Athens line.

Hazardous Weather

Overnight Tonight

Weather Forecast Office
Fort Worth, TX
Issued May 04, 2018 4:10 AM CDT

Chances of showers and thunderstorms will shift to southeast of a Lampasas to Athens line after midnight tonight.

With skies clearing across the rest of the region, areas of fog are expected to develop before daybreak Saturday.

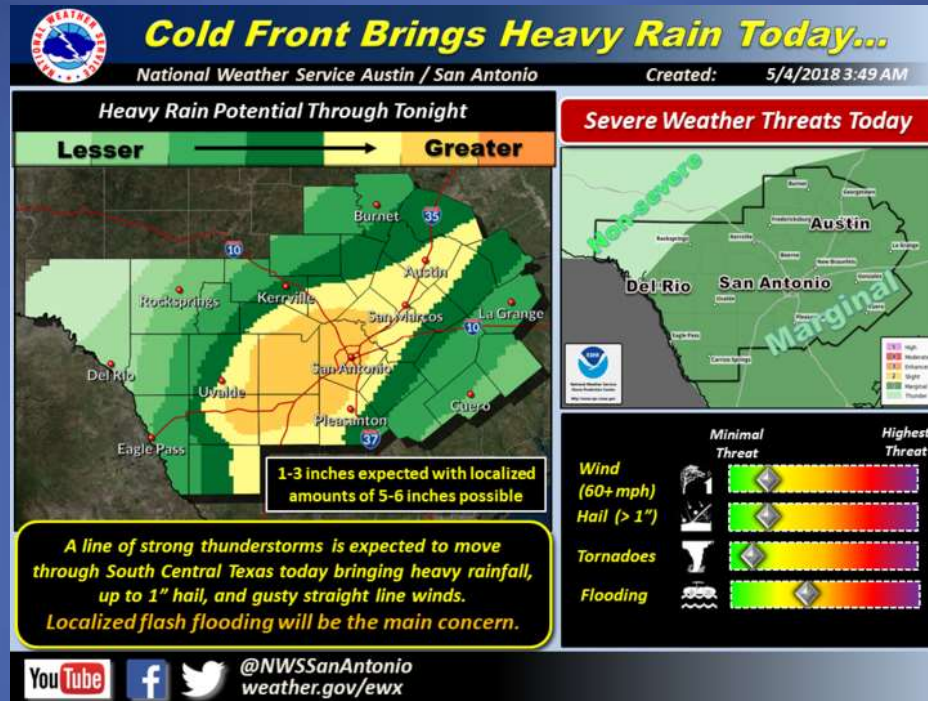

426 AM CDT
Fri May 4 2018
National Weather Service
Fort Worth, TX

As the cold front moves deeper into South Texas lingering rain chances southeast of a Lampasas to Athens line will end before daybreak. Skies will continue to clear from the northwest. With these clearing skies, light winds and wet ground from recent rains, areas of fog are expected to develop across much of North and Central Texas. Visibilities may be reduced to less than 1 mile in some locales.

A Marginal Risk for Severe Thunderstorms will exist with the approach and passage of a cold front across the area today and tonight. The main threat will be damaging wind gusts.

Hazardous Weather

A line of strong thunderstorms are expected to move through South Central Texas today. This will bring the potential for localized flash flooding to some spots where the heaviest downpours develop. 1- 3 inches of rainfall are possible with isolated amounts of 5-6 inches possible as well. In addition, hail up to the size of quarters and gusty straight line winds are possible.
